“Vaccines” are Genocide Bio Weapons

GENE EDITING? DEPOPULATION? WHAT ARE THESE SHOTS REALLY FOR?

Four Doctors Reply: These mRNA experimental vaccines are designed to sterilize and genetically modify us.

Summary by Edward Menez(henrymakow.com)In the above Bitchute, posted by Tim Truth, several doctors claim that the hidden agenda of the the mRNA vaccines (Moderna, Pfizer, etc.) is genocide.

The main speaker is Dr. Nagase from British Columbia, who is seen in several live speeches. Dr. Nagase mentions how the never-before tried process–hence, “experimental vaccines”–uses an insidious process called “reverse transcriptase” to insert mRNA into the victim’s cells, which then infects the recipient’s DNA. The effects are spread to future generations.

🔴 An employee at Moderna who works in their vaccination production center...

She says that they are all paid huge amounts of money to keep their mouth shut about whats in the vaccine and what its meant to do to the vaccinated person. She was talking about millions of USD that they each get + having to sign confidentiality agreements and more legal agreements. So, nobody will ever talk about it all. In short: Once you take the jab and in a matter of minutes, a "plastic-like", synthetic, microscopic structure is spreading throughout the body and it invades the capillaries. It attaches itself to the most fragile, and weakened internal organs in your body. There, it then RADIATES the organ and the whole entire body, 24/7. Until it gets significantly damaged. As a result, some people with heart issues will get miocarditidis or a heart attack. Others will suffer with benign ovarian issues, or will get ovarian cancer, or lung cancer, kidney, & prostate malign issuess. She said to us that the introduction of this structure is DELIBERATE. No design error, no accident, but it is done with the exact purpose of radiating you, similar to plutonium but slower and impossible to detect. This explains why Geiger EMF devices pick up higher levels of radiation in vaxxed people compared to those not vaccinated. This also explains why being around vaxxed people or having intimate contact with them does influence you atthe EM field level and you get sick, or you bleed or have migrenes and have "radiation-like" symptoms which we call "shedding". Pretty much the PERFECT bio weapon. The same applies to ALL other MRNA vaccines, she said.

The organs most affected are the liver, spleen, and ovaries. The last pair of chromosomes, the sex chromosomes X and Y, are particularly harmed leading to infertility. If a parent is lucky enough to give birth, the reverse transcriptase process which changes the parent’s DNA is passed on to the baby. Dr. Lee Merritt describes “Self Disseminating Vaccines for Emerging Infectious Diseases”.

These target the ovaries specifically and were tested on rats. Through contact and “shedding”, the rats passed on this same sterilization to a larger group of rats with whom they came in contact. Dr. Merritt pointed out that the Johnson & Johnson vaccine is a self disseminating vaccine and has the same sterilization properties. Dr. Tom Cowan also talks about reverse transcriptase. He mentions how once the mRNA infect cells and create a new DNA in the human genome, this new DNA will take over and create its own spike proteins which are different from one’s original DNA. This is genetic engineering.

Another clip believed to be a CIA doctor in a talk from April 13, 2005, shows brain scans (or fRMIs) picturing how religious fanaticism will light up a particular part of the brain.

This doctor’s tests were done using respiratory viruses like the flu to spread a “cure” for this fundamentalism. The name of his project is “FunVAX”, which stands for the vaccine for religious fundamentalism. Dr. Richard Fleming also talks about converting mRNA into DNA. He mentions that in a human body with 23 chromosome pairs, mRNA can change the DNA in all of these pairs except #8, 15, and 20. These three pairs have not been shown to be hindered so far.

Overall, the message from this video is clear: these mRNA experimental vaccines are designed to sterilize and genetically modify us.
